# Introduction

Massachusetts towns utilize different types of fire departments: career, call, volunteer, and combination departments. Career fire departments employ their personnel on a full-time basis and receive regular compensation. Call fire departments receive nominal benefits and are paid when called out. Volunteer fire departments receive no compensation. A combination department usually has a limited number of personnel who are paid on a full-time basis that is augmented with a call force. Generally, career departments will be more expensive than combination departments, which will be more expensive than call departments, which will be more expensive than volunteer departments. Career departments are also known as full-time departments. Some fire departments are full-time by day but call by night and/or on weekends.

There are almost 29,800 fire departments in the United States of which only about 15% are full-time departments<sup>1</sup> but protect almost 2/3rds of the population. Not knowing how many full-time departments there were in Massachusetts, I did a little research and put the information in this document. There are about 360 local fire departments in Massachusetts of which about one hundred eighty-five (185) consider themselves to be full-time fire departments. Of that number, about ninety (90) are true full-time departments (use full-time personnel exclusively) with the other “full-time” fire departments being combination departments.

Massachusetts has 351 incorporated municipalities of which 42 are cities and another eight have been granted a city form of government but still preferred to be called a town.

- Massachusetts has no unincorporated towns. Massachusetts, Rhode Island and Connecticut are the only three New England States with no unincorporated towns and one of only four States nationwide.

In Massachusetts, the local fire departments are either municipal fire departments, part of a fire district, or private corporations.

## Municipal Fire Departments

Of the 351 municipalities, 335 have a municipal fire department. A municipal fire department is part of a city or town funded by the city's or town's general fund budget which is paid for primarily through property taxes. The career departments listed in the first table are municipal departments unless it is indicated they are part of a fire district. Some of these career fire departments, however, are assisted by a volunteer fire company.

- In FY09, the Rowley Fire department went from a private organization to a municipal department.
- Upton Fire and EMS became a town department in 2010.

## Fire Districts

Ten towns have fire services provided by one or more fire districts. A fire district is a quasi-municipal corporation. It is an independent governmental entity that exists separately from the municipality in which it resides. They are usually created for specific purposes such as fire, water, lighting, sewer, etc. As such, they have their own taxing authority. Usually, district taxes are included in the property tax bill put out by the municipality and the municipality passes the district taxes on to the district. However, some districts have their own tax collector and those district residents receive two property tax bills, one from the town and one from the district.

Towns with a single fire district providing fire services to the entire town are Adams, Dalton, and Williamstown.

---

<sup>1</sup> U.S. Fire Department Profile Through 2015. April 2017. Hylton J.G. Haynes and Gary P. Stein.

## Fire Departments and Emergency Medical Services in Massachusetts

Towns with multiple fire districts providing fire services to the town include Barnstable, Dartmouth, Newbury, Palmer, Shelburne, South Hadley, and Wareham..

- Barnstable has five fire districts: Barnstable, COMM, Cotuit, Hyannis, and West Barnstable.
- Dartmouth has three fire districts: Dartmouth #1 (southeastern part of town), Dartmouth #2 (southwestern part of town), and Dartmouth #3 (northern part of town)
- Montague has two fire districts: Montague Center and Turner Falls
- Newbury has two fire districts: Byfield and Newbury.
- Palmer has four fire districts: Bondsville, Palmer, Thorndike, and Three Rivers. Thorndike receives fire coverage from the Palmer fire district.
- Shelburne has two fire districts: Shelburne Corner and Shelburne Falls.
- South Hadley has two fire districts: South Hadley #1 and South Hadley #2.
- Wareham has two fire districts: Onset and Wareham.

Some fire districts provide more than just fire services. For example, the Dalton fire district is also provides water services.

### **Private Fire Departments**

Six towns do not have a municipal fire department nor fire districts. Clarksburg, Egremont, New Marlborough, Peru, Sandisfield, and Tolland have a single private, non-profit corporation providing fire services to the town. Each has their own fire chief and each receives funding from their town.

There are several fire associations that provide civic/social benefits to their respective towns and those are the Belchertown, Cotuit, Goshen, Harwich, Sherborn, Southwick, Sunderland, Truro, Tyngsborough, and West Tisbury Firefighter Associations.

### **National Standards**

The National Fire Protection Association (NFPA) developed a standard, known as NFPA 1710, to guide full-time fire departments on the minimum number of personnel needed for safe and effective firefighting. To provide EMS care (including transport), the State of Massachusetts and NFPA 1710 requires at a minimum 2 personnel. With the majority of the call volume increasingly becoming EMS related, I choose two (2) in-house EMTs and/or firefighters to be the minimum staffing level as the requirement for a fire department to be deemed capable of providing immediate coverage.

Two represents the minimum number of personnel to respond to an EMS call not to a structure fire. The Occupational Safety and Health Administration (OSHA) 29 CFR 1910.134(g)(4) defines a "2-in/2-out" rule for fighting interior structure fires. Responding to a structure fire with less than four firefighters prevents the first responding unit from complying with OSHA's "2-in/2-out" standard, and places the lives of those firefighters in jeopardy. Whether the towns listed in this document comply with this regulation is not known nor is that the purpose of this document.

### **Fire Budgets**

The budgets for all the municipalities (but not fire districts) can be found on the Local Government link on the State's web site. From that page, select Finance then the Municipal Data and Financial Management then Data Bank Reports then Municipal Actual Revenues and Expenditures.

The state requires all municipalities (but not fire districts) to file the Schedule A. This schedule includes General Fund Revenues and Expenditures only. It does not include Special Revenue Funds, Enterprise Funds,

## Fire Departments and Emergency Medical Services in Massachusetts

and Capital Outlays as they feel this provides the best way to insure fair comparisons. Even so, comparisons are still not really possible. Some municipalities include employee benefits and pension costs in the fire department budget. Many do not. Some fire departments have their own mechanic, many rely on their DPW. Some include hydrant rental costs, many do not.

Ideally, it would be better to show the true operating costs or full-cost budget which has all costs allocated to each department so it is clear what it costs to run that department. As such, a full-cost budget for the fire department has wages, benefits, insurance, utilities, fuel, pension costs, equipment repairs, and hydrant rentals in its departmental operating budget. The fire districts do full-cost budgeting but not very many of the municipal departments do but that is due to how the municipalities like to budget.

### Ambulance Service

In Massachusetts, EMS services are coordinated through the State's Office of Emergency Medical Services. BLS and ALS staffing and ambulance transport are defined by the "105 CMR 170.000: Emergency Medical Services System" regulations. Massachusetts has four levels of staffing: EMS First Responder (EFR), EMT-B, EMT-I, and EMT-P. For ambulance service, Massachusetts has three levels: BLS, ALS intermediate, and ALS paramedic. The state requires two (2) licensed personnel to be in a transporting ambulance at all times

BLS -> 2 licensed providers with one being EMT-B

ALS intermediate -> 2 licensed EMTs with at least one at EMT-I level or higher

ALS paramedic -> 2 licensed EMTs with both at EMT-P level or one EMT-P and one EMT-I

Most towns with full-time fire departments have a BLS ambulance service provided by the fire department or municipal ambulance service.

The ambulance member fees, patient receipts, and paramedic intercepts are significant revenue sources. The fees and patient receipts are revenue deposited in either the General Fund or a special reserve fund. Ultimately, both mechanisms are used to reduce taxes in some form.

When a town has a municipal ambulance service that is separate from the fire department, the fire department may still provide a first responder service. While the town collects fees for the ambulance service, the fire department is not able to collect any monies. This is fine if the fire and ambulance services are both municipal departments because the receipts go into the general fund. But in towns with fire districts, none of the fire departments in the fire districts are able to collect any fees for the first responder service they provide. But the first responder service provided is very important as treatment is started before the ambulance arrives and the firefighters assist the ambulance service personnel.

Just as volunteer fire departments have experienced significant decreases in volunteers, volunteer ambulance services have had similar experiences. The NY Times ran an article "Sounding the Siren for Volunteer Drivers" in October 2001 indicating that the lack of volunteers is due to (1) significant training time; (2) yearly recertification; (3) fewer employers being willing to let employees leave; and (4) increases in call volume requiring more time commitments. As a result, many volunteer ambulance service providers are starting to hire daytime personnel as this is considered to be the time period of greatest need.

### Estimating Ambulance Service Costs

For towns that don't break out the cost of their ambulance and fire services separately due to having cross-trained personnel, how can one estimate the cost of the ambulance service? A generally accepted costing model on how to estimate the cost of EMS services for such a fire department has the following formula:

- A. Personnel Costs = average on-call time x average hourly labor rate x average number of personnel on the call x number of incidents prior year. (Hourly rate includes benefits)
- B. Vehicle = (Operating cost per mile x annual call miles) + annual cost for ambulance replacement.

## Fire Departments and Emergency Medical Services in Massachusetts

- C. Supplies = Actual Cost of Medical Supplies per year + costs of billing service.
- D. Indirect Costs = 25% (A+B+C). 25% is used as a factor to address other benefits and training costs.

Several fire departments in the state use this formula in determining the fee to charge towns contracting for ambulance service. There is some merit to taking the formula in part A and multiplying it by the number of shifts but that is not considered part of the formula at this time.

### Document Organization

The coverage information is provided in three tables. The first table lists those fire departments that provide immediate coverage 24/7.

The second table lists those fire departments that provide immediate coverage for some portion of the day. All provide immediate coverage during the weekday because of the difficulty getting call firefighters to respond during the day. The coverage end time varies anywhere from 4PM to midnight. Each table lists the town, its last known population, who dispatches the fire department, the budget numbers for fire and ambulance/EMS, ambulance revenue, staffing information, and call volume.

The third table (not present yet) lists those fire departments that provide 24/7 coverage but it is not immediate coverage as there is no staff in-house when the call first comes in. In other words, it lists the call and volunteer fire departments. NFPA 1720 guides volunteer fire departments on the minimum number of personnel needed for safe and effective firefighting.

While this document will not provide staffing information for the call/volunteer departments, it should be noted that the number of people able to participate as firefighters has dropped significantly in many towns for several reasons: time demands, increased training requirements, increase in call volume requiring more time commitments, changes in sociological conditions, fire leadership problems, and increasing use of combination departments<sup>2</sup>. As a result, many volunteer or on-call fire departments are starting to hire two daytime firefighters as this is considered to be the time period of greatest need.

### Staffing Levels

The National Institute of Standards and Technology published a report in 2010 entitled "Report on Residential Fireground Field Experiments". This report found that a four person crew completed all tasks on the fireground 30% faster than a two person crew and 25% faster than a three person crew. Similar results were seen with laddering and ventilation. Interestingly, four person crews completed primary search and rescue operations 6% faster than three person crews but 30% faster than two person crews. Two person crews took almost a minute longer than three person crews to stretch a hose line and almost 90 seconds longer than four person crews. With this in mind, it might be interesting to see what the staffing levels are in Massachusetts fire departments.

The first line in the staffing levels column shows full-time and on-call. Full-time personnel are career firefighters, chief officers, and any full-time civilians (i.e., executive secretary and dispatchers). The initial staffing levels in FY07 are shown and if there has been any change in staffing levels, it will be followed by an arrow ('=>') and then the new levels. The second line in the staffing levels column reflects the number of groups or platoons using full-time personnel.

The third line is the shift schedule (for those departments that provide 24/7 immediate coverage). Many full-time fire departments in Massachusetts use a 1-1-1-5 shift schedule (1 day on, 1 day off, 1 day on, and 5 days off) or a 1-2-1-4 shift (1 day on, 2 days off, 1 day on, and 4 days off) where 1 day is 24 hours. There are a few departments that work a 10/14 shift which is two 10-hour days followed by two 14-hour nights followed by four

---

<sup>2</sup> "Retention and Recruitment in the Volunteer Fire Service: Problems and Solutions", December 1998

## Fire Departments and Emergency Medical Services in Massachusetts

days off. The cycle then repeats. There are also a couple of departments that use a modified 10/14 shift which is 2 days on, 1 day off, 2 nights on, and 3 days off.

The fourth line is the number of fire stations in the municipality or district.

### **Call Volume**

The calls for service (CFS) were taken from town reports or provided by the fire department. There are some cases where the EMS data came from MFIRS.

- The Massachusetts State Fire Marshal's office is in charge of the Massachusetts Fire Incident Reporting System (MFIRS). The Massachusetts Fire Marshal's Office requires that every fire response be reported to the State Fire Marshal's office. Any fire department applying for federal grants is required to submit all incident data to MFIRS. If a fire department is found not to be in compliance with MFIRS after receiving such a grant, that department could be asked to refund all grant monies.
- The Massachusetts Emergency Medical Services Bureau maintains a Ambulance Run Data System. or MATRIS. Each EMS provider licensed in the state is expected to enter all patient contact information into this system in an effort to improve and insure top quality out of hospital emergency medical care to all residents of the State.

The calls for service are broken down into EMS and total calls. An EMS call is defined to be medical and rescue related since this is the definition used by NFIRS. Non-EMS (other) calls are fire, hazard, hazardous materials, and service calls. To the extent possible, I have tried to exclude service calls dealing with inspections (i.e., new homes, oil burners, chimneys, wood stoves, etc), training classes, and meetings as these are not emergency calls. Some report only emergency calls; other towns report emergency and non-emergency calls. Motor Vehicle calls may actually show up in both EMS and other calls if the town has both a rescue squad and fire department.

- A '#' symbol in any call volume column indicates that call data was not available.
- The EMS call volume numbers for those towns with a private ambulance service are responses by the fire department not the private ambulance service.
- The following fire departments provide ambulance service to other towns. The number in parenthesis is the number of towns each town services including itself. Amherst (5), Hinsdale (4), Charlemont (4), Orange (4), Byfield (3), Athol (2), Easthampton (2), Richmond (2), and Sandisfield (2). So, the EMS call volume numbers for these communities are not specific to that municipality alone.
- The following towns have a municipal ambulance service separate from the fire department: Barre, Becket, Belchertown, Berlin, Billerica, Bolton, Boston, Brookfield, Carver, Conway, Harvard, Hatfield, Lee, Leicester, Mattapoisett, Oak Bluffs, Otis, Rockport, Shirley, and Tisbury. Their statistics will be listed in green in the EMS call column. Wareham and Webster also have a municipal EMS but their statistics if available, are shown as a footnote.
- Brimfield Ambulance, Colrain Ambulance, Hardwick Rescue Squad, North Adams Ambulance, North Brookfield EMS, Palmer Ambulance, Rehoboth Ambulance, Spencer Rescue, Swansea Ambulance, and West Brookfield EMS are private organizations.
- The Mendon Fire Department began providing ambulance service in 2001. Northfield EMS started its own fee-based ambulance service in the fall of 2010. The Melrose Fire Department started its own fee-based ambulance service in 2011.
- Sheffield EMS started as a first responder service in 2009.
- The Lexington and Needham Fire Department provide begin paramedic services in 2001
- Greenfield fire department begins providing BLS service in 2014.

## Fire Departments and Emergency Medical Services in Massachusetts

There has been some consolidation of fire and EMS services over the last decade.

- Belchertown EMS became a separate municipal department in 2000, breaking off from the police department. They then merged with the fire department in 2012.
- Townsend EMS and fire merged in FY08.
- New Bedford fire and EMS will be merging into one department and Marion EMS merged with the Fire Department to become Marion Fire-EMS in 2012.
- Lancaster EMS merges with the Lancaster Fire Department in 2014.

Firefighters are trained for firefighting and for EMT duties. Emergency response has been consolidated into many fire departments such that the majority of the call volume for a fire department today is EMS-related not fire. In fact, over the last 20 years, the number of EMS responses has more than tripled while fires have decreased by almost 50%<sup>3</sup>. It is estimated that 66% of all fire department calls in 2011 were EMS-related<sup>4</sup>. As we have seen with the floods in March 2010, fire departments are expected to respond to natural disasters. With the advent of 9/11, fire departments also are expected to respond to acts of terrorism. So, the role of a firefighter has changed dramatically from years ago. The fire department is also involved in fire prevention activities (such as public education and property inspections) and on-going training of its personnel.

Keep in mind that the call volume does not reflect the call response time. For example, the call volume may go down by a few calls but the call response time may actually be higher. So, call volume alone is not necessarily the only indicator of measuring the “busyness” of a fire department. Another example is the number of EMS calls. While the number of EMS calls may represent 66% of all calls, it is important to remember that an EMS call typically requires on average about 45 minutes and two or three personnel. Fire calls frequently require most, if not all, on-duty personnel and take many hours to mitigate. When looking at it from this perspective, the number of hours spent performing EMS functions versus fire functions is more like 50% each. Unfortunately, in at least one municipality, the officials looked at the call percentage and concluded that if the EMS service was privatized, it would reduce workload by 62% and hence, the fire department would not need as many personnel. Therefore, it cannot be stressed enough that call volume alone is not necessarily the only indicator of measuring the “busyness” of a fire department.

A comparison of municipal call volume across the New England States can be found in Appendix A to see if there are any trends in EMS and/or fire calls across New England.

### **Mutual Aid**

An issue of growing concern for some fire departments is the increase in the number of simultaneous calls. This is not an area that much attention has been paid to but it puts additional stresses on a department. When an incident or multiple simultaneous incidents occur such that the available local fire department resources are overwhelmed, then additional help is summoned from other nearby fire departments. When fire departments help each other in this fashion, it is called Mutual Aid. In fact, a recent survey conducted for ISO<sup>5</sup> indicates that over 50% of fire departments call on mutual aid to respond to initial alarms for a structure fire due to lack of responders.

In some communities, a fire department in an adjacent municipality can provide a quicker response than the local fire department. Typically, these fire departments enter into an Automatic Mutual Aid agreement. Automatic Aid provides for a fire department in another municipality to immediately respond to reported fires because it is closer, thus providing the quickest response of manpower and equipment to incidents, and allowing

## Fire Departments and Emergency Medical Services in Massachusetts

more of the municipality to remain protected at all times. In the same ISO Survey, over 60% indicated that neighboring departments responded due to Automatic Aid agreements.

Automatic Mutual Aid is set up as agreements between participating fire departments. Mutual Aid is set up as Run cards and clearly defines which fire departments are to respond to a fire when requested at different fire alarm levels.

Fire Mutual Aid is allowed by Massachusetts General Law under Chapter 48, section 59A. Unlike New Hampshire, there are only two Massachusetts-based mutual aid associations: Tri-State and Mid-State. Instead, Massachusetts has 15 Fire Districts that were created by Executive order by the Governor back in 1950 under Chapter 639 for Civil Defense purposes. These are regional mutual aid associations within a District. In addition, municipalities can form their own mutual aid agreements with surrounding towns or join mutual aid associations such as Tri-State and Mid-State. A list of the mutual aid organizations in the State is provided in Appendix B.

Each fire district has a designated Control Center. A Control Center is not a Dispatch Center. The Control Centers control mutual aid at a specifically established point, where they take over the coverage assignments and dispatch for a specific incident according to a prearranged plan. Recently, through Homeland Security funding, the Control Points in some Districts have been connected and can serve to assist each other, which was not possible before.

Local communities currently dispatch their own police and fire and ambulance but when a major incident occurs the Control Center picks up dispatching at a predetermined point. The local community continues to handle other calls for service but the fire mutual aid is dispatched by the control center.

### **Fire Dispatch**

One of the keys to limiting damage caused by fire is the response time. NFPA 1710 sets a goal for all career fire departments to respond to a fire within 6 minutes. Response time is defined as the time from when a 911 call is first received to the time a fire truck arrives on scene. Part of this 6-minute window is 1 minute for dispatch time. Fire and ambulance agencies are dispatched from a dispatch center. Some people believe that all 911 calls go directly to their local dispatch center rather than to a central location. Basic 911 Service is an emergency telephone system that automatically connects 911 callers to a Public Safety Answering Point (PSAP). Enhanced-911 service does the same plus shows the caller's name, street address, and telephone number to the PSAP. This allows the PSAP to identify the caller's location automatically if the caller is unable to communicate this information verbally to the PSAP call taker. Enhanced-911 services are provided by the Massachusetts Enhanced 911 Bureau and are paid for by a monthly user fee on all telephones (land and wireless).

In Massachusetts, most towns have their own PSAP. The following table shows the fire and EMS calls over the last 5 years.

<b>Massachusetts</b>	<b>2010</b>	<b>2011</b>	<b>2012</b>	<b>2013</b>	<b>2014</b>	<b>2015</b>	<b>5yr Avg</b>
Muni EMS calls	406,253	429,488	442,310	443,486	472,447	510,956	450,823
Fire calls	32,680	29,110	31,229	29,828	28,989	31,302	30,367
Non-fire calls	288,693	309,746	285,297	298,686	306,611	327,928	297,807
Total Muni Calls	727,626	768,344	758,836	772,000	808,047	870,186	784,173
% Muni EMS calls	55.8%	55.9%	58.3%	57.4%	58.5%	58.7%	57.5%
% Muni Fire Calls	4.5%	3.8%	4.1%	3.9%	3.6%	3.6%	3.9%

The Fire and EMS calls were taken from the State Fire Marshal's Annual Report.

### **Issues Facing Fire Departments in MA:**

Aging apparatus and facilities. It is estimated that 48% of all engines in Massachusetts fire departments are at least 15 years old. This is close to the national average. The industry standard for the life span of a fire engine is 15 years followed by 5 years of reserve status. Starting in 2007, the EPA's new emission standards go into effect to which the fire apparatus industry must comply. It is estimated that this will increase the cost of a new engine by as much as 50K. These new emission standards will significantly reduce the amounts of nitrous oxide, particulate matter, and non-methane hydrocarbon (NMHC) emissions.

Roughly 66% of the existing fire stations are estimated to be over 40 years old, 16% have no backup power and 28% are not equipped for exhaust emission control per NFPA 1500 2002 9.1.6.<sup>6</sup>

Most fire departments are not able to meet the OSHA 2in-2out rule as most departments have the first response engine containing less than 4 firefighters.

### **CAVEAT EMPTOR**

The personnel and number of stations initially came from the Fire Department Census Survey found on the US Fire Administration website and were cross-referenced with information from the town web sites and/or town reports. The population numbers were taken from the US Census Bureau.

The information in this document came from various sources (town officials, audit reports, budget documents, and town reports) and the information was verified to the extent it was possible. While I tried to be as accurate as possible, there is the possibility for errors. Hopefully, if there are any errors, someone will be kind enough to point them out to me.

2010:

Bridgewater loses 4 firefighter positions through attrition reduces shift staffing levels by one.  
Sharon dispatched by Holbrook Public Safety Dispatch Center

2012:

South Shore Regional Emergency Communications Center opens and is the dispatch center for Cohasset, Hingham, Hull, and Norwell.  
Sudbury combines fire and police dispatch into Public Safety dispatch center.  
Stockbridge fire chief position becomes a full-time position.  
Abington and Whitman switches to Holbrook Public Safety Dispatch Center

2013:

Essex County Regional Emergency Communications Center opens in July and is the dispatch center for Amesbury, Beverly, Essex, Middleton, Topsfield, and Wenham.  
Harwich now dispatched by Barnstable County Sheriff's Office  
Revere and Winthrop open a joint dispatch center managed by the Revere PD.  
Wenham fire chief position becomes a full-time position.

---

<sup>6</sup> Third Needs Assessment of the U.S. Fire Service in Massachusetts. October 2011. NFPA Fire Analysis and Research.

## Fire Departments Providing 24/7 Immediate Coverage

## Appendix A - EMS and Fire Emergency Calls across New England

Using information from the State Fire Marshal Office Annual Reports for Vermont, Maine, and Massachusetts; and NFIRS for Connecticut and New Hampshire, we can look at the number of municipal fire and EMS calls to determine if any trends can be observed. Since all the data (including that in the FMO Annual Report) is taken from NFIRS, it is dependent on the number of fire departments entering their data into the system and there is not 100% compliance.

New England State	2010	2011	2012	2013	2014	2015	2016	5yr Avg
Connecticut

## Fire Departments and Emergency Medical Services in Massachusetts

In looking at Connecticut, Massachusetts, and New Hampshire, the percentage of fire and EMS calls relative to the total calls are similar. Of the non-fire calls, false alarms and service calls account for between 25% and 30% of the total emergency calls for the five States in the table above.

- Maine's percentage of fire and EMS calls relative to the total calls are higher than these three States. This may be partly due to the fact that slightly less than half the fire departments report incident data.
- Vermont's percentage of fire calls is higher and the percentage of EMS calls is lower relative to the total calls. The lower EMS percentage may be due to Vermont's reliance on non-profits for ambulance service (although many towns have a first responder squad) and its higher fire call percentage may be due to its small population and smaller density (population per square mile).

## Appendix B – Mutual Aid Associations

Mutual Aid System	State	Member Towns		
TriState Fire Mutual Aid Association	NH	Hinsdale	Keene	Swanzy
	VT	Brattleboro	Guilford	Halifax
		Vernon		
	MA	Amherst	Ashfield	Athol
		Bernardston	Buckland	Charlemont
		Colrain	Conway	Deerfield
		Erving	Gill	Greenfield
		Hadley	Hawley	Heath
		Leverett	Leyden	Monroe
		Montague	New Salem	Northfield
		Orange	Pelham	Petersham
		Rowe	Royalston	Shelburne Ctr
		Shelburne Falls	South Deerfield	Sunderland
		Turner Falls	Warwick	Wendell
Whately	Williamsburg			
Mid-State Fire Mutual Aid Association (1957)	MA	Acton	Ashburnham	Athol
		Ashby	Ayer	Barre
		Berlin	Bolton	Boylston
		Clinton	Fitchburg	Gardner
		Hardwick	Harvard	Holden
		Hubbardston	Lancaster	Leominster
		Lunenburg	New Braintree	Oakham
		Orange	Paxton	Petersham
		Petersham	Princeton	Royalston
		Rutland	Shirley	Sterling
		Templeton	Townsend	West Boylston
Westminster	Winchendon	Worcester		
Barnstable County Fire District (Mutual Aid District 1) Control – Barnstable County Sheriff's Department	MA	Barnstable	Bourne	Brewster
		Chatham	Cotuit	Dennis
		Eastham	Falmouth	Hyannis
