INTRODUCTION

Municipalities utilize different types of fire departments: career, call, volunteer, and combination departments. Career fire departments employ their personnel on a full-time basis and receive regular compensation. Call fire departments receive nominal benefits and are paid when called out. Volunteer fire departments receive no compensation. A combination department usually has a limited number of personnel who are paid on a full-time basis that is augmented with a call force. Generally, career departments will be more expensive than combination departments, which will be more expensive than call departments, which will be more expensive than volunteer departments. Career departments are also known as full-time departments. Some fire departments are full-time by day but call by night and/or on weekends.

There are almost 29,819 fire departments in the United States of which only about 17% are full-time departments¹ but protect 2/3rds of the population. Just under half these fire departments also provide a basic level EMS service. There is a total of 223 local fire departments in Vermont of which nine (9) are considered full-time departments. Of the nine full-time departments, only one fire department is a true full-time department in that it uses full-time personnel exclusively. The other “full-time” fire departments are combination departments. There are two other fire departments that provide immediate coverage during the day with nights and weekends being on-call.

- Vermont has 246 incorporated municipalities, 35 villages which are considered to be municipalities, and 9 unincorporated towns and gores.
- The unincorporated towns and gores are Averill, Avery’s Gore, Ferdinand, Lewis, Warner’s Grant, Warren’s Gore, Buel’s Gore, Glastenbury, and Somerset. The first six (6) in this list are in the Northeast corner of Vermont and are known as the unified towns and gores of Essex County. Glastenbury and Somerset are towns in Southern Vermont that were unincorporated in 1937. None of the unincorporated towns and gores has a fire department.
- The 35 villages are Albany village, Alburg Village, Barton Village, Bellows Falls, Cabot Village, Cambridge Village, Derby Center, Derby Line, Enosburg Falls, Essex Junction, Hyde Park Village, Jacksonville, Jeffersonville, Johnson Village, Ludlow Village, Lyndonville, Manchester Village, Marshfield Village, Morrisville, Newbury Village, Newfane Village, North Bennington, Perkinsville, North Westminster, Old Bennington, Orleans Village, Poultney Village, Saxton’s River, Swanton Village, Waterbury Village, Wells River, West Burke, Westminster Village, and Woodstock Village. Some of the villages have their own fire department and those will be shown in the tables categorizing the fire departments.

As you can deduce, the majority of the fire departments in Vermont are volunteer firefighters. This means they do not fight fires for a paycheck but do so to give back to their community. The National Fire Protection Association (NFPA) estimates that volunteer fire departments save taxpayers almost \$140 billion per year in firefighting costs.

NFPA estimates that 65% of firefighters in the United States are volunteers but that number is declining from 8 per thousand people protected to just under 6 per thousand people protected². FEMA estimates that there has been over a 20% decline of volunteer firefighters over the last few years. Another concern is that over half the volunteer firefighters are over 50 years old. Why the decline? The more common reasons given are:

1. Companies no longer allow employees to leave work to respond to an emergency call.
2. Younger people are moving to places where there are jobs and/or a lower cost of living.

¹ U.S. Fire Department Profile 2017. March 2019. Ben Evarts and Gary P. Stein.

² U.S. Fire Department Profile 2017. March 2019. Ben Evarts and Gary P. Stein.

Fire Departments and Emergency Medical Services in Vermont

3. The number of hours to train is significant and has become more intense, time which people may no longer have if they are raising a family.

Municipal Fire Departments

A municipal fire department is part of a city or town funded by the city's or town's general fund budget which is paid for primarily through property taxes. The career departments listed in the first table are all municipal departments.

- Bennington, Essex, Rockingham, and Troy each have a municipal fire department and a village fire department.
- The Walden Fire Department became a municipal fire department in 1971.
- North Pownal, Pownal Center, and East Pownal Fire departments merged into the Pownal Valley Fire Department in 1994.
- Middlebury and East Middlebury fire departments merged in 1997.
- West Rutland Fire District merged with the town of West Rutland in 1999 to become a municipal department.
- The Milton village fire department merged with the town of Milton forming the Milton fire department.
- The Putney fire department became a municipal department in 2001.
- The Pomfret VFD (covering North Pomfret) and the Teago fire department (covering South Pomfret) merged into the Pomfret-Teago VFD in 2012. Though independent from the town, the town partially funds the fire department.
- Barton and Orleans fire departments merged into Orleans Fire Department in 2018.
- Corinth and East Corinth Fire Departments have merged into the Corinth Fire Department in 2018.
- Colchester contracts for fire services from the private, non-profit Colchester Center Volunteer Fire Department (established in 1951) which is part of Colchester Fire District #3 and from Mallets Bay Fire Department (established in 1952) which is part of Colchester Fire District #2. In July 2020, the two fire departments merged to become the municipal Colchester Fire Department.

Fire Districts

A fire district is a quasi-municipal corporation. It is an independent governmental entity that exists separately from the municipality in which it resides. They are usually created for specific purposes such as fire, water, lighting, sewer, etc. As such, they have their own taxing authority. Usually, district taxes are included in the property tax bill put out by the municipality and the municipality passes the district taxes on to the district. However, some districts have their own tax collector and those district residents receive two property tax bills, one from the town and one from the district.

Vermont has many fire districts but the majority of fire districts exist to provide water and/or sewer not fire services. Seven towns have fire services provided by one or more fire districts while two towns have multiple fire departments with at least one fire department part of a fire district.

- Bennington has three fire departments but only Bennington rural (Catamount Hose Company established in 1953) is part of a fire district

Towns with a single fire district providing fire services to the entire town are Brandon, Chelsea, Westminster, and Williamstown.

Fire Departments and Emergency Medical Services in Vermont

- The Brandon fire district provides fire (Dunmore Hose Company) and water services to the town.
- The Norwich fire department moved from being part of a fire district to being a town department in 1989.
- Berlin Fire District merged with the Montpelier Fire Department in 2002.

Towns with multiple fire districts providing fire services to the town are Dorset, Wallingford, and Weathersfield

- Dorset has two fire districts: Dorset and East Dorset fire districts.
- Wallingford has two fire districts: Wallingford fire district #1 (established in 1907) and Wallingford fire district #2 which funds the East Wallingford fire department.
- Weathersfield has two fire districts: Ascutney and West Weathersfield. A fire study suggested that the two departments should be merged into a single municipal department but residents voted it down in 2019.

Private Fire Departments

Several towns do not have a municipal fire department nor fire districts. Instead, they get fire services from a private fire department. Addison, Alburgh, Bakersfield, Barton, Berlin, Charleston, Clarendon, Castleton, East Montpelier, Franklin, Glover, Grand Isle, Granville, Guilford, Highgate, Johnson, Ludlow, North Hero, Readsboro, Sheldon, South Royalton, Strafford, Thetford, Tinmouth, Underhill-Jericho, Vershire, Wells, Williston, and Wilmington all use a private, non-profit fire department. Barnard, Burke, Cavendish, Dover, Fairfield, Hyde Park, Londonderry, Lunenburg, Newbury, Newfane, Pomfret, Pownal, Randolph, and Woodstock have multiple private volunteer fire departments, each in a geographic fire district not a taxing fire district. Each has their own fire chief and each receives funding from their town.

For a list of the fire departments described above and when they were established, please refer to Appendix D.

National Standards

The National Fire Protection Association (NFPA) developed a standard, known as NFPA 1710, to guide full-time fire departments on the minimum number of personnel needed for safe and effective firefighting. To provide EMS care (including transport), the State of Vermont and NFPA 1710 requires at a minimum 2 personnel. With the majority of the call volume increasingly becoming EMS related, I choose two (2) in-house EMTs and/or firefighters to be the minimum staffing level as the requirement for a fire department to be deemed capable of providing immediate coverage.

Two represents the minimum number of personnel to respond to an EMS call not to a structure fire. The Occupational Safety and Health Administration (OSHA) 29 CFR 1910.134(g)(4) defines a "2-in/2-out" rule for fighting interior structure fires. Responding to a structure fire with less than four firefighters prevents the first responding unit from complying with OSHA's "2-in/2-out" standard, and places the lives of those firefighters in jeopardy. Whether the towns listed in this document comply with this regulation is not known nor is that the purpose of this document.

The coverage information is provided in four tables. The first table lists those fire departments that provide immediate coverage 24/7. The second table lists those fire departments that provide immediate coverage for some portion of the day. All provide immediate coverage during the weekday because of the difficulty getting call firefighters to respond during the day. The coverage end time varies anywhere from 5PM to 10PM. Each table lists the town, its last known population and coverage area for land (excludes water), the PSAP center for fire and EMS, the local dispatch center, staffing information, and call volume.

The third table lists those fire departments that provide 24/7 coverage but it is not immediate coverage as there is no staff in-house when the call first comes in. In other words, it lists the call and volunteer fire departments. The majority of the fire departments in Vermont are call and volunteer departments. NFPA 1720 guides volunteer fire

Fire Departments and Emergency Medical Services in Vermont

departments on the minimum number of personnel needed for safe and effective firefighting. While this document will not provide staffing information for the call/volunteer departments, it should be noted that the number of people able to participate as firefighters has dropped significantly in many towns for several reasons: time demands, increased training requirements, increase in call volume requiring more time commitments, changes in sociological conditions, fire leadership problems, and increasing use of combination departments³. As a result, many volunteer or on-call fire departments are starting to hire two daytime firefighters as this is considered to be the time period of greatest need though this does not appear to be happening yet in Vermont. However, to handle the increase in paperwork and inspections, some towns started to hire a full-time chief such as Wilmington and Norwich. Several departments in Vermont cannot provide adequate coverage during the day so they have automatic aid agreements where both departments respond (i.e., Hyde Park and Morrisville, Elmore and Wolcott).

The fourth table lists those towns with no fire department and shows who they contract out for fire and ambulance service.

Fire Budgets

Municipalities are free to use any format for internal financial reporting such as for budgeting or cost accounting. For example, some municipalities roll up health insurance, dental insurance, life insurance, disability insurance, workers comp, and unemployment insurance into the employee benefits section and Property & liability insurance into the insurance section of the general government account. Other municipalities budget this in the fire department account. Legal fees appear to be rolled up into the legal account for all municipalities; and building maintenance is in the general government account while covered by the fire department in others.

- The University of Vermont pays a fixed fee for fire services to the city of Burlington which is accounted for as fire department revenue.
- Calais contracts for fire coverage from East Montpelier paying 25% of the East Montpelier Fire Department budget and from Woodbury paying 33% of the average Woodbury Fire Department operating costs of the prior three years.
- Panton contracts for fire coverage from Vergennes for a fixed price per year plus an hourly wage to each member of the Vergennes fire department that responds to the fire call.
- St George contracts for fire coverage from Hinesburg and pays 15% of the Hinesburg Fire Department budget.
- The Sheffield-Wheelock fire district budget is shared by the two towns via an intergovernmental agreement with each paying 50% of the operating and capital budgets.
- Elmore and Wolcott respond to each other's calls

Full-cost budgeting has all costs allocated to each department so it is clear what it costs to run that department. As such, a full-cost budget for the fire department has wages, benefits, insurance, legal fees, utilities, fuel, equipment repairs, mechanic, and hydrant rentals (if appropriate) in its departmental operating budget. I am keeping capital budget (including debt service) separate since most towns do capital outlays as warrant articles. Of the full-time fire departments, the only ones that do full-cost budgeting appear to be Hartford, Montpelier, St. Albans, and South Burlington with the exception that all roll up legal fees into the general government budget.

One possible way to assess a fire department is by determining the cost to protect all property in the municipality it serves. This includes not just taxable properties but all properties.

Fire Departments and Emergency Medical Services in Vermont

Ambulance Service

In Vermont, EMS services are coordinated through the State's Department of Health, specifically the Office of EMS and Injury Prevention. Over a third of Vermont's ambulance services respond to less than one call a day, which makes maintaining skills difficult and requires a financial subsidy from covered communities (Vermont State Health Plan 2005 Part 4: Focus Areas).

Vermont has four levels of staffing: Emergency Care Attendant (ECA), EMT-B, EMT-I, EMT-P. For ambulance service, Vermont has three levels: BLS, ALS intermediate (ILS), and ALS paramedic. The state requires two (2) licensed personnel to be in a transporting ambulance at all times with the only requirement that one of the licensed providers be at least an EMT-B.

There are two types of emergency medical services in the EMS realm – a first responder service and an ambulance service.

- A first responder service provides emergency medical care at the scene but cannot provide emergency transport to a hospital. Given the time it may take for an ambulance to arrive on scene, first responder services are very prevalent (approximately 90) in Vermont. However, since they are not involved in emergency transport, they cannot bill patients for their services. Therefore, their town funds first responder services. First responders will be shown in the EMS agency column in the various tables.
- An ambulance service provides emergency transport to a hospital. Over a third of Vermont's ambulance services respond to less than one call a day which makes maintaining skills difficult and requires a financial subsidy from covered communities (Vermont State Health Plan 2005 Part 4: Focus Areas). Emergency ambulance transport is a billable service. Most towns contract out for emergency ambulance service although there are some towns that provide their own municipal emergency transport service. Ambulance service will be present in the Transport Agency column in the various tables.

There are basically five types of ambulance service: A fire department-based ambulance service, a municipal ambulance service (separate from the fire department), a non-profit ambulance service, a hospital-based ambulance service, and a commercial ambulance service. Appendix F shows the ambulance service providers and the towns they serve.

Vermont is different from the rest of the New England States in that most towns use a volunteer, non-profit ambulance service, although that number has decreased over the last few years. The volunteer, non-profit ambulance services may use a subscription service in which residents pay a small yearly subscription fee. If the ambulance service is needed, the insurance company is billed and the resident is not responsible for anything not paid by the insurance company. If a resident chooses not to pay the subscription fee, the resident is responsible for whatever the insurance company does not cover. Ambulance services offering a subscription service are: Calex Ambulance, Essex Rescue, Fairfax Rescue, Ludlow Ambulance, Mad River Valley Ambulance, Rescue Inc, Richmond Rescue, and Waterbury Ambulance.

There are 80 ambulance transporting agencies but not all provide emergency transport service. The following table summarizes the number of emergency ambulance providers by category and the number of towns covered. Vermont has a total of 246 municipalities and the total covered shows 258. This is due to several towns covered by multiple transport agencies. The third column in the table shows the number of emergency ambulance transport providers in Vermont and what percentage of providers are in each category.

State	# Providers	% providers	Towns Covered	% towns served
Fire Department	18	26%	44	17%
Municipal Dept	13	19%	29	11%
Non-Profit	37	53%	174	67%
Hospital	0	0%	0	0%
Commercial	2	3%	11	4%
Total	70		258

Fire Departments and Emergency Medical Services in Vermont

The last column in the above table shows what percentage of towns is serviced by emergency ambulance transport providers in the State. So, while 53% of the ambulance transport agencies are volunteer, non-profit ambulance companies, they service 67% of the municipalities in Vermont.

Please note that the above table does not take into consideration the ambulance services providing paramedic intercepts. It only reflects those ambulance service providers with emergency ambulance transport contracts with the municipalities in Vermont.

Paramedic services are not currently available in Franklin and Grand Isle Counties. While there are services in the counties which have Paramedics on-board, they are only licensed to the intermediate level of care. There are several initiatives in place within each district to implement paramedic level care. In Chittenden County, paramedic services became available in the last two years by Charlotte Rescue, Colchester Rescue, Essex Rescue, and South Burlington.

Some towns don't break out the cost of ambulance service, primarily because its firefighters are cross-trained and can function either as a firefighter or an EMT depending on the nature of the call. When the ambulance service is budgeted separate from the fire service, it likely does not reflect the true cost of operating the ambulance service.

The ambulance member fees, patient receipts (from private insurance, government insurance, or taxpayers themselves if uninsured), and paramedic intercepts are combined into ambulance revenue because I believe it to be a significant revenue source. The fees and patient receipts are revenue deposited in either the General Fund or into a special reserve fund. Ultimately, both mechanisms are used to reduce taxes in some form.

There are some private, non-profit ambulance services that do not charge for their service.

- Deerfield Valley Rescue and Mad River Valley Ambulance Service rely on a subscription service and revenue from insurance billings to pay for its services rather than rely on town subsidies.
- St. Michael's Rescue relies on insurance payments to fund their service and do not ask for a subsidy from the towns they service as they learned that they could not request Medicaid or Medicare funding if they were subsidized in part by Towns. However, starting in July 2020, St. Michael's Rescue has informed Hinesburg and St. George that it can no longer serve the two communities due to increasing call volume.
- Calais gets ambulance service from East Montpelier and pays 30% of the ambulance budget.

All the fire departments in the first table providing ambulance service do their own billing so they pay no service fees to a billing company.

In the 2018 Report to The Vermont Legislature, the Emergency Medical Services Advisory Committee indicated that 8 out of 10 transfer services are having difficulty with recruitment and retention.

- In 2018, Derby Line ambulance, Danville Rescue, and Barton Ambulance ceased operations.
- In 2019, Ludlow Ambulance Service had to request the Ludlow taxpayers for a significant subsidy to pay for the part time and full-time salaries needed because there were not enough volunteers.
- Several years ago, the Brighton Rescue Squad disbanded and the Montgomery Rescue Squad could no longer provide adequate response so Montgomery is now contracting with Enosburg Ambulance to provide emergency ambulance transport to its residents.

Types of Ambulance

A new ambulance will cost between \$150K and \$200K and if well maintained should be expected to get 250,000 miles without major work. There are basically three types of ambulance:

- Type I ambulances have a square compartment which houses a patient and a cab which contains the driver. The connection between the cab and the patient compartment is a small pass-through window.

Copyright © 2007-2021. klingreport.com

Given the time I have put into compiling this document, please do not copy or distribute without my written permission.

Fire Departments and Emergency Medical Services in Vermont

- Type II ambulances is a van-like ambulance which makes it easier to maneuver when an area has narrow streets like a big city.
- Type III ambulances have a square compartment which houses a patient and a cab that is an integral part of the patient compartment. The connection between the cab and the patient compartment is usually a doorway.

Estimating Ambulance Service Costs

Typical costs for an ambulance are vehicle insurance (\$1500 per year), medical supplies (\$10K per year), vehicle maintenance (\$5K to \$6K per year), fuel (\$5K per year), service contracts (\$1200 per year), disinfectants or sanitizing solutions after delivering a patient (\$50 per year). Many ambulance services use a billing company to collect fees at a cost of 6 to 10% which also handles medicare/Medicaid compliance. There is the cost of training and annual recertification fees (\$1000 per year). There is the cost of maintaining medical records for patients, hospitals affiliations, HIPPA compliance, radio systems (\$5K to \$6K per year), etc. These costs run about \$50K a year.

For towns that don't break out the cost of their ambulance and fire services separately due to having cross-trained personnel, how can one estimate the cost of the ambulance service? A generally accepted costing model on how to estimate the cost of EMS services for such a fire department has the following formula:

- A. Personnel Costs = average on-call time x average hourly labor rate x average number of personnel on the call x number of incidents prior year. (Hourly rate includes benefits)
- B. Vehicle = (Operating cost per mile x annual call miles) + annual cost for ambulance replacement.
- C. Supplies = Actual Cost of Medical Supplies per year + costs of billing service
- D. indirect Costs = 25% (A+B+C). 25% is used as a factor to address other benefits and training costs.

Several fire departments in the state use this formula in determining the fee to charge towns contracting for ambulance service. There is some merit to taking the formula in part A and multiplying it by the number of shifts but that is not considered part of the formula at this time.

When someone takes an ambulance, some ambulance services charge you based on the care provided (basic life support or advanced life support) while others will charge based on the medications, oxygen, etc. used.

Fire Department Staffing Levels

The National institute of Standards and Technology published a report in 2010 entitled "Report on Residential Fireground Field Experiments". This report found that a four person crew completed all tasks on the fire ground 30% faster than a two person crew and 25% faster than a three person crew. Similar results were seen with laddering and ventilation. Interestingly, four person crews completed primary search and rescue operations 6% faster than three person crews but 30% faster than two person crews. Two person crews took almost a minute longer than three person crews to stretch a hose line and almost 90 seconds longer than four person crews. With this in mind, it might be interesting to see what the staffing levels are in Vermont fire departments.

The first line in the staffing levels column shows full-time and on-call. Full-time personnel are career firefighters, chief officers, and any full-time civilians (i.e., executive secretary). The initial staffing levels are shown and if there has been any change in staffing levels, it will be followed by an arrow ('=>') and then the new levels. The second line in the staffing levels column reflects the number of shifts using full-time personnel with the following exceptions:

- Bellows Falls has a daytime staffing of 3 when one includes the fire chief and deputy fire chief. Nights have two firefighters: one full-time and one call firefighter.

Fire Departments and Emergency Medical Services in Vermont

- While Montpelier has a crew of 3 per shift, it is typically augmented so there are 5 personnel on duty during the day and 4 on duty half the night as they have 2 part-time EMTs who provide 24/7 coverage.

The fourth line is the number of fire stations in the municipality or district.

Firefighters are trained for firefighting and for EMT duties. Emergency response has been consolidated into many fire departments such that the majority of the call volume for a fire department today is EMS-related not fire. In fact, over the last 20 years, the number of EMS responses has more than tripled while fires have decreased by almost 50%⁴. It is estimated that 66% of all fire department calls in 2011 were EMS-related⁵. As we have seen with the floods seen in the Caledonia and Orleans Counties in July and southern Vermont counties in April, fire departments are expected to respond to natural disasters. With the advent of 9/11, fire departments also are expected to respond to acts of terrorism. So, the role of a firefighter has changed dramatically from years ago. The fire department is also involved in fire prevention activities (such as public education and property inspections) and on-going training of its personnel.

Fire Department Shifts

The third line is the shift schedule (for those departments that provide 24/7 immediate coverage). A department with three shifts typically employs a 24/48 shift. This means one day (24-hour) on followed by two days off with one Kelly day every third week. A department with four shifts typically works 42 hours per week and the work shift is employed in a variety of ways. A 24/72 shift means one day (24-hour) on followed by three days off. A 10/14 shift means two 10-hour days followed by two 14-hour nights followed by four days off. All the different shifts are depicted in Appendix A at the end of this document.

Call Volume

The calls for service (CFS) came from fire and EMS narrative reports found in town reports, provided by the fire chief of the department, provided by various dispatch centers, and/or were taken from the State Fire Marshal's Annual Report which show emergency calls only so there may be differences with the call numbers in town reports as they may contain emergency and non-emergency calls. Unfortunately, the fourteenth edition of "Fire in the United States 1995-2004" by the US Fire Administration indicates that only 65% of all Vermont fire department use NFIRS (upon which VFIRS is based). The latest Vermont Fire Marshal's report indicates that this may be up to 68% today.

The calls for service are broken down into EMS and total FD calls. If EMS is provided by the fire department then the EMS numbers will be in black. If the EMS call numbers are in green, this means it is the call volume of the EMS Agency which may or may not be the transport provider. If an agency covers multiple towns then I try to show the EMS call data of that town only. If the EMS agency contains the name of the town then the call data represents the total calls including those of the towns it covers. If I show "No Data Avail" then I was not able to get call data for that agency.

Keep in mind that the call volume does not reflect the call response time. For example, the call volume may go down by a few calls but the call response time may actually be higher. So, call volume alone is not necessarily the only indicator of measuring the "busyness" of a fire department. Another example is the number of EMS calls. While the number of EMS calls may represent 66% of all calls, it is important to remember that an EMS call typically requires on average about 45 minutes and two or three personnel. Fire calls frequently require most, if not all, on-duty personnel and take many hours to mitigate. When looking at it from this perspective, the number of hours spent performing EMS functions versus fire functions is more like 50% each. Unfortunately, in at least one municipality, the officials looked at the call percentage and concluded that if the EMS service was privatized, it would reduce workload by 62% and hence, the fire department would not need as many personnel.

⁴ Effective Fire Protection: A National Concern. A Study by the Insurance Service Office (ISO).

⁵ Fire Loss in the United States During 2011. September 2012. Michael J. Karter, Jr.

Fire Departments and Emergency Medical Services in Vermont

Therefore, it cannot be stressed enough that call volume alone is not necessarily the only indicator of measuring the “busyness” of a fire department.

A comparison of municipal call volume across the New England States can be found in Appendix B to see if there are any trends in EMS and/or fire calls across New England.

Fire Mutual Aid

An issue of growing concern for some fire departments is the increase in the number of simultaneous calls. This is not an area that much attention has been paid to but it puts additional stresses on a department. When multiple simultaneous incidents or a single incident occur such that the available local fire department resources are overwhelmed, then additional help is summoned from other nearby fire departments. When fire departments help each other in this fashion, it is called Mutual Aid. In fact, a recent survey conducted for ISO⁶ indicates that over 50% of fire departments call on mutual aid to respond to initial alarms for a structure fire due to lack of responders.

In some communities, a fire department in an adjacent municipality can provide a quicker response than the local fire department. Typically, these fire departments enter into an Automatic Mutual Aid agreement. Automatic Aid provides for a fire department in another municipality to immediately respond to reported fires because it is closer, thus providing the quickest response of manpower and equipment to incidents, and allowing more of the municipality to remain protected at all times. In the same ISO Survey, over 60% indicated that neighboring departments responded due to Automatic Aid agreements.

Automatic Mutual Aid is set up as agreements between participating fire departments. Mutual Aid is set up as Run cards and clearly defines which fire departments are to respond to a fire when requested at different fire alarm levels.

Mutual Aid is covered under Vermont Statute 175:2981 for fire and ?? for EMS. To form a Mutual Aid District, the communities involved must petition the State Fire Marshal. There are several Mutual Aid Districts in the state. ***An attempt was made to list them in Appendix C and the towns that belong to them but the data is not complete and has not been verified so use caution with the data.*** There are communities in New Hampshire, New York, and Massachusetts that belong to various mutual aid organizations throughout the state. Besides providing mutual aid, these organizations may also be used for joint training, group purchases, coordination of equipment purchases, and dispatch.

Fire Dispatch

One of the keys to limiting damage caused by fire is the response time. NFPA 1710 sets a goal for all fire departments to respond to a fire within 6 minutes. Response time is defined as the time from when a 911 call is first received to the time a fire truck arrives on scene. Part of this 6-minute window is 1 minute for dispatch time. Fire and ambulance agencies are dispatched from a dispatch center. Some people believe that all 911 calls go directly to their local dispatch center rather than to a central location. Basic 911 Service is an emergency telephone system that automatically connects 911 callers to a Public Safety Answering Point (PSAP). Enhanced-911 service does the same plus shows the caller’s name, street address, and telephone number to the PSAP. This allows the PSAP to identify the caller’s location automatically if the caller is unable to communicate this information verbally to the PSAP call taker. Enhanced-911 services are provided by the Vermont Enhanced 911 Board and are funded from the Universal Service Fund. The 911 surcharge pays for 911 computers, software, maintenance, connectivity, training and other 911-specific issues.

Originally, the intention was to have 911 calls geographically dispersed, meaning that 911 calls received in Rutland and surrounding areas, would be routed to Rutland but that is no longer true today. Vermont once had 53 primary PSAPs but that has been reduced to six primary PSAPs located throughout the State: St. Albans City PD, Hartford PD, Shelburne PD, Westminster VSP, Williston VSP, and the Lamoille CSO.

⁶ Fire Chief’s Opinion 2008. ISO, September 2008

Fire Departments and Emergency Medical Services in Vermont

In the fire tables, there is a column for PSAP which shows the PSAP for that town. All calls to 911 in Vermont are routed to the appropriate PSAP. Police and fire calls are immediately transferred to the appropriate local dispatch center. For medical emergencies, the appropriate EMS responder is called but the PSAP stays on the line providing appropriate emergency medical instructions while waiting for the responder to arrive. The following table shows which towns are associated with a given PSAP center.

Agency	Dispatch Center
Cavendish, Hartford, Hartland, Norwich, Pomfret, Reading, Sharon, Royalton, Weathersfield, West Windsor, Windsor, Woodstock	Hartford PD
Barre Town, Belvidere, Cambridge, Eden, Elmore, Greensboro, Hardwick, Hyde Park, Johnson, Morristown, Stowe, Waterville, Wolcott	Lamoille CSO

In the fire tables, there is also a column for dispatch which indicates the local dispatch center for fire and EMS. Some local dispatch centers dispatch fire and EMS, some EMS only, some dispatch police and fire, and some just dispatch police. When a different dispatch center handles fire and EMS then the first line will indicate the fire dispatch and the second line the EMS dispatch. Appendix E shows the different local dispatch centers for fire and EMS.

The following table shows the total 911 calls over the last seven years. This information was taken from the yearly report to the Governor.

	2013	2014	2015	2016	2017	2018	2019	2020
Total 911 calls	208,367	215,504	206,401	203,142	199,324	204,937	209,606	209,990

Fire Departments and Emergency Medical Services in Vermont

Issues Facing Fire Departments

The biggest issue appears to be the aging apparatus and facilities and the lack of equipment.

- Roughly 41% of the existing fire stations are estimated to be over 40 years old, with a little over a third of the stations have no backup power and more than half are not equipped for exhaust emission control per NFPA 1500 2002 9.1.6.
- It is estimated that more than 40% of all engines in Vermont fire departments are at least 15 years old⁷. This is close to the national average. The industry standard for the life span of a fire engine is 15 years followed by 5 years of reserve status. Starting in 2007, the EPA's new emission standards go into effect to which the fire apparatus industry must comply. It is estimated that this will increase the cost of a new engine by as much as 50K. These new emission standards will significantly reduce the amounts of nitrous oxide, particulate matter, and non-methane hydrocarbon (NMHC) emissions.
- Providing firefighters with proper and up-to-date equipment such as portable radios, SCBA units, Personal Alert Safety System devices, and personal protective clothing. The protective clothing costs about 2,000 and the SCBA units cost about 4,500 on average.⁸

Many of the older fire stations were built in the town center when it was where the population center was. As the towns have built outward, fire stations are no longer centrally located. We have seen regionalization of dispatch services and to some extent, ambulance services. With the cost of new fire stations and apparatus, will regionalization of fire services be next?

CAVEAT EMPTOR

The personnel and number of stations initially came from the Fire Department Census Survey found on the US Fire Administration website and were cross-referenced with information from the town web sites and/or town reports. The population numbers were taken from the US Census Bureau. The Fire and EMS calls were taken from town reports, the Vermont Fire Marshal's Annual Reports, dispatch centers, and town officials.

The information in this document came from various sources - town reports, town plans, St. Albans Police Dispatch Center, Shelburne Dispatch, Washington County Department of Public Safety (WCDPS), Upper Valley Regional Dispatch Center, Twin State Fire Mutual Aid Dispatch (via Grafton County Sheriff's Office Dispatch), and town officials - and the information was verified to the extent it was possible. While I tried to be as accurate as possible, there is the possibility for errors. Hopefully, if there are any errors, someone will be kind enough to point them out to me.

⁷ Third Needs Assessment of the Fire Service: Vermont. October 2011. NFPA Fire Analysis and Research, Quincy MA

⁸ National Volunteer Fire Council 2005 Fact Sheet.

Fire Departments and Emergency Medical Services in Vermont

Change Summary

FY2006:

Burlington increased its staffing by one.

FY2009:

South Burlington increases shift staffing by two by hiring six full-time firefighters.

St. Albans City decreases shift staffing by 3 by laying off eight full-time firefighters.

FY2011:

Readsboro switches to North Adams ambulance service.

FY2014:

Whitingham ambulance service and Valley Rescue Squad go out of business.

2017:

South Newfane Fire Department dissolves due to lack of volunteers.

FY2018:

Barton ambulance service goes out of business.

Barton and Orleans fire departments merge into Orleans Fire Department

Berkshire 1st Response dissolved.

Corinth and East Corinth Fire Departments have merged into the Corinth Fire Department

Danville Rescue ceases operations and ambulance transport transitions over to Calex Ambulance.

Marshfield switches from Cabot Ambulance to East Montpelier FD Ambulance due to lack of volunteers at Cabot.

North Adams Ambulance and Village Ambulance merge to become Northern Berkshire EMS.

FY2019:

Highgate switches ambulance service from Amcare to Missisquoi Valley Rescue.

Colchester and South Burlington combine dispatch services using Colchester PD.

Milton switches dispatch service from Colchester PD to St. Albans PD.

Missisquoi Rescue switches dispatch service from St. Albans PD to Porter Hospital.

FY2020:

Colchester Center Volunteer Fire Company and Malletts Bay Fire Department merge to become a town fire department. As a result of the merger, 3 full-time firefighters will be hired.

⁹ The EMS calls are for the Regional Ambulance Service which covers the City not the fire department.

Cost To Protect Property per \$1000 Valuation

There are various statistical measures that can be used to determine the cost effectiveness of a fire department. Most center on the cost per capita which can be a misleading statistic for those communities that get a large influx of visitors on weekends or the summer. For those communities, the cost per call may be a more telling statistic. One statistical measure I like is the cost to protect all property in a town. As this table shows, there can be a significant difference between the cost per \$1000 based on taxable properties and that of all properties. However, a fire department is expected to protect all properties so the cost to protect all properties gives a more realistic picture of the true cost to protect property in a municipality.

Full-time Departments

Town	2018 Taxable Property Valuation	2018 Tax-Exempt Property Valuation	Cost/\$1000 Protected Value (Taxable)	Cost/\$1000 Protected Value (All Properties)

Fire Departments and Emergency Medical Services in Vermont

Call/Volunteer Fire Departments

This table lists the towns with call or volunteer fire departments. Many towns have their own fire department. Some towns have fire departments as part of a village or fire district. Some towns have private, non-profit fire departments that a town will help fund. Those towns having names of fire departments after the name of the town are some combination of municipal, private, and/or fire district departments.

Worcester	999 in 38.8 sq mi	Williston VSP	Capital West Dispatch	No Data Avail	About 100 annually	Worcester FD FAST Squad	Montpelier Fire

Aggregating all the fire and EMS calls together is shown in the following table.

	2013	2014	2015	2016	2017	2018	2019	2020
EMS calls	71,743	83,241			89,136	100,929	104,395	
EMS FD calls	22,225	22,513	23,535	23,208	21,295	25,012	22,439	23,182
Fire calls	4,169	4,203	3,575	3,269	2,458	2,660	2,274	2,693
Total Calls	43,831	45,296	45,763	44,085	40,764	45,871	41,660	44,225

The Fire and EMS FD calls were taken from the Vermont Fire Marshal's Annual Reports. The EMS calls came from the Vermont Department of Health.

Towns with No Fire Departments

There are several towns with small populations that cannot afford to fund a fire department. This table lists those towns and shows the fire and emergency ambulance agencies they contract with to provide fire and ambulance coverage.

Municipality	Pop	PSAP	Dispatch	Fire Coverage Provided by	Transport Agency
Andover	467 over 28.6 sq mi	Westminster VSP	Springfield PD	Chester Fire	Chester Fire

Appendix B - EMS and Fire Emergency Calls across New England

Using information from the State Fire Marshal Office Annual Reports for Vermont, Maine, and Massachusetts; and NFIRS for Connecticut and New Hampshire, we can look at the number of municipal fire and EMS calls to determine if any trends can be observed. Since all the data (including that in the FMO Annual Report) is taken from NFIRS, it is dependent on the number of fire departments entering their data into the system and there is not 100% compliance.

New England State	2013	2014	2015	2016	2017	2018	2019	5yr Avg
Connecticut

Fire Departments and Emergency Medical Services in Vermont

In looking at Connecticut, Massachusetts, and New Hampshire, the percentage of fire and EMS calls relative to the total calls are similar. Of the non-fire calls, false alarms and service calls account for between 25% and 30% of the total emergency calls for the five States in the table above.

- Maine's percentage of fire and EMS calls relative to the total calls are higher than these three States. This may be partly due to the fact that slightly less than half the fire departments report incident data.
- Vermont's percentage of fire calls is higher and the percentage of EMS calls is lower relative to the total calls. The lower EMS percentage may be due to Vermont's reliance on non-profits for ambulance service (although many towns have a first responder squad) and its higher fire call percentage may be due to its small population and smaller density (population per square mile).

Appendix C – Mutual Aid Associations

Most of the county mutual aid associations coordinate mutual aid with respect to dispatch operations and joint training. They generally do not get involved with equipment purchases.

Mutual Aid Association	Year Form	Departments/Towns
Addison County Firefighters Association (www.addisoncountyfire.org)	1944	Addison, Bridport, Bristol, Cornwall, Ferrisburg, Lincoln, Middlebury, Monkton, New Haven, Orwell, Ripton, Salisbury, Shoreham, Starksboro, Vergennes, Weybridge, Whiting
Bennington County Mutual Aid Assn		Arlington, Bennington, Bennington Rural, Dorset, East Dorset, Manchester, North Bennington, Pownal, Pownal Village, Rupert
Chittenden County Fire Mutual Aid (www.ccfmas.org)	2000	Bolton, Burlington, Charlotte, Colchester, Essex, Essex Junction, Grand Isle, Hinesburg, Huntington, Jericho, Mallets Bay, Milton, North Hero, Richmond, Shelburne, South Burlington, St. George, South Hero, Underhill, Westford, Williston, Winooski
Franklin County Mutual Aid Association (17 departments in VT, 5 in Canada)	1974	VT: Alburg, Bakersfield, Berkshire, East Fairfield, Enosburg, Fairfax, Fairfield, Fletcher, Franklin, Georgia, Highgate, Milton, Montgomery, Sheldon, St. Albans City, St. Albans Town, Swanton CA: Philipsburg, Sutton
Grand Isle County Mutual Aid System		Alburg, Grand Isle, Isle LaMotte, North Hero, South Hero
Lamoille County Mutual Aid Association		Cambridge, Eden, Elmore, Hyde Park, Johnson, Morrisville, North Hyde Park, Stowe, Wolcott
Rutland County Fire Mutual Aid Assn (http://rutlandcountyfiremutualaid.org)	1985	Benson, Brandon, Castleton, Chittenden, Clarendon, Danby-Mt. Tabor, East Wallingford, Fair Haven, Hubbardton, Ira, Mt. Holly, Pawlet, Pittsfield, Pittsford, Poultney, Proctor, Rutland City, Rutland Town, Killington, Shrewsbury, Tinmouth, Wallingford, Wells, West Haven, West Pawlet, West Rutland
Capital Fire Mutual Aid System (36 departments)		Barre City, Barre Town, Berlin, Bolton, Cabot, Calais, Chelsea, Duxbury, Groton, E. Montpelier, Marshfield, Middlesex, Montpelier, Moretown, Northfield, Peacham, Plainfield, Roxbury, Stowe, Waitsfield, Walden, Warren, Waterbury, Waterbury Village, Woodbury, Wolcott, Worcester
Connecticut River Valley Mutual Aid		VT: Ascutney, Bellows Falls, Bridgewater, Cavendish, Chester, Hartland, Killington, Ludlow, Mount Holly, Plymouth, Proctorsville, Putney, Reading, Rockingham, Saxton's River, So. Londonderry, So. Woodstock, Springfield, West Windsor, W.Weathersfield, Westminster, Weston, Windsor, Woodstock NH: Charlestown, Claremont, Cornish
Deerfield Valley Mutual Aid System		Dover, Halifax, Marlboro, Readsboro, Whitingham
Northeast international Mutual Aid Systems (16 departments in VT, 2 in Canada)	1973	VT:Albany, Barton, Brighton, Charleston, Craftsbury, Derby, Glover, Irasburg, Jay, Lowell, Newark, Newport City, Newport Center, North Troy, Orleans, Troy, Westmore, Woodbury CA: Masonville,, Memphremagog East
Northeast Mutual Aid (17 departments)		East Burke, Concord, East Haven, Lyndon, Newark, Sutton, Sheffield-Wheelock, West Burke, Westmore
Rural Vermont Mutual Aid System		Craftsbury, Greensboro, Hardwick, Walden
Tri-Mountain Mutual Aid		Jamaica, Londondery, Peru, So.Londonderry, Stratton Mtn, Weston, Winhall, Windham

The Franklin County Mutual Aid and Grand Isle County Mutual Aid dispatching is done through the St. Albans Central dispatching system. The Lamoille County Mutual Aid dispatching is done through the Lamoille County

Fire Departments and Emergency Medical Services in Vermont

Sheriff's Office. The Rutland County Fire Mutual Aid dispatching is done through the Vermont State Police dispatch center in Rutland. Tri-Mountain Mutual Aid is dispatched out of SWNH.
